SKILLS

- MongoDB
- Model-View-Controller
- Object-Relational-Mapping
- REST API's
- Git BASH
- Object-Oriented Programming
- Node.js
- Javascript
- Express.js
- MySQL
- Insomnia
- Heroku
- GitHub

EDUCATION

COMPUTER SCIENCE - FULL STACK WEB DEVELOPMENT *Sep 2023*
UC Davis, Davis, CA

EXPERIENCE

TECHNICAL LEAD *Aug 2018- Current*
Diversity Risk Management, Roseville, CA

- Driving operational efficiency by managing databases, ensuring data accuracy, and maintaining the company website for a seamless user experience.
- Coordinating best IT practices to not only ensure security but also to keep operations smooth to align with business strategies.
- Educating non-tech staff to bridge the gaps between tech and business while also continuously evaluating emerging technologies.
- Identifying, diagnosing, and resolving any bugs in the databases and company website back end.

BACK-END DEVELOPER *Jul 2023- Jul 2023*
Upwork, Sacramento, CA

- Refactored the back-end of an application to facilitate seamless object-relational mapping.
- Created a password model in Javascript utilizing Sequelize to only post a sign-up request to the database if the password string met certain criteria.
- Implemented email regex to match patterns in the strings from user input to validate and push for further processing.

LANGUAGES

English, Fluent

INTERESTS
